

## Appendix A

### Key changes to Environment page on the TC website, with approx dates

Existing text is black

Green text added when survey is published (18 February)

Red text added when intention to form working group is announced (poss w/b 21 February)

In March 2021 the Council held an online public consultation event to discuss plans to expand #sustainablemarlow with the aim of accelerating Marlow's transition to net zero carbon emissions and achieving wider sustainability goals.

In February 2022 the Council published a survey of what Marlow residents think about the environment, and the sustainable behaviours they do or want to do.

Also in February 2022 the Council announced plans to create the Sustainable Marlow Challenge, a programme to encourage all residents to adopt greener lifestyles. It also invited interested community groups and residents to join the Sustainable Marlow Challenge Working Group to help drive the programme.

### **Sustainable Marlow Challenge and Working Group**

February 2022

Marlow Town Council has announced its intention to launch a programme of public engagement and communications aimed at encouraging residents to adopt more sustainable behaviours. The programme will be called the Sustainable Marlow Challenge.

To make the Challenge as effective as possible the Council wishes to work with any resident or community group that is passionate about sustainability and would like to contribute by running a behaviour change project or helping with communications.

The Council invites all individuals and groups interested in supporting the Challenge to participate in the Sustainable Marlow Challenge Working Group. This will meet quarterly to discuss the Challenge and its constituent projects.

The first meeting of the Working Group will be held on X March 2022 at [location], from 5pm to 6:30pm. Please email [X@marlow-tc.gov.uk](mailto:X@marlow-tc.gov.uk) to register your attendance or to request more information about the Sustainable Marlow Challenge.
